About

Enthusiastic, qualified architect of the city of Buffalo owns a passion for Urban design. I noticed that the field of architecture is dominated by two opposite extremes. On the one hand, an avant-garde of crazy ideas, often so far removed from reality that they become nothing more than eccentric curiosities. On the other hand, a more traditional approach that focuses on practicality rather than innovation. As someone who is interested in both architecture and life, I'm passionate about finding ways to bring these two aspects together into something greater than either would be possible alone.

Hobbies

Education

2021-2023

Master Of Architecture [M.Arch]

University at Buffalo [UB] | NY

Specialized in the urban design in community oriented zones, public design, City-Scapes.

2014-2019
